PROFILE

Computer Engineering graduate from Cavite State University–CCAT Campus (2026) specializing in full-stack web development and embedded systems. Led the development of LibLocker, an automated library baggage locker combining Raspberry Pi, Python/Flask, and dual-frequency RFID, with hands-on responsibility for both software and hardware integration. Experienced in PHP/MySQL and JavaScript for web applications, Python for backend and embedded development, and Flutter for mobile applications. Seeking an entry-level Software Developer, Web Developer, or IT role where I can contribute to building practical, reliable, and user-focused technology solutions.

TECHNICAL SKILLS

Programming Languages: PHP, JavaScript, Python, C++, HTML5, CSS3, SQL

Frameworks & Libraries: Flask, Node.js, Flutter, React

Databases: MySQL, Firebase, SQLite

Embedded Systems & Hardware: Raspberry Pi, Arduino, ESP32

Development Tools & Platforms: Git, Linux, Raspberry Pi OS, VS Studio, Claude Code

Design & Productivity: Figma, Canva, AutoCAD, Capcut

PROJECTS

LibLocker — Automated Library Baggage Counter (2025 – 2026)

Lead Developer | Raspberry Pi 4B | Python/Flask | Dual-Frequency RFID

- Architected and developed the dual-frequency RFID system, integrating an HF RC522 reader for locker access and UHF RFID for passive entry detection through a Flask-based Python kiosk.
- Integrated 24 solenoid locks through MCP23017 expanders and developed a custom USB-to-RS232 Python driver to enable communication with the UHF reader.
- Deployed and validated the production system using SSH, firewall configuration, and SPI, achieving 100% RFID accuracy, a 6.8-second average transaction time, 95% uptime, and a 4.63/5 usability score across 30 users.

RAWR Casino — Web Application (2025)

PHP | MySQL | JavaScript | HTML | CSS

- Developed a database-driven casino web application using PHP and MySQL, implementing user authentication and persistent game data.
- Implemented backend game logic and database persistence to process game outcomes and maintain user/session data across interactions.

TourGO — Car Rental Web Platform (2025)

PHP | MySQL | JavaScript | HTML | CSS

- Developed a full-stack car rental platform using PHP, MySQL, and JavaScript to support customer, rental agency, and administrative workflows.
- Implemented role-specific workflows for customers, rental agencies, and administrators, organizing the platform around distinct rental and management responsibilities.

Escape — Multiplayer Mobile Game (2024)

Flutter | Frontend Developer

- Developed the Flutter frontend for an offline multiplayer board game inspired by Snake and Ladder, incorporating custom mechanics such as wormholes and portals.
- Built the responsive player-facing interface to support turn-based gameplay and local multiplayer interactions.

PROFESSIONAL EXPERIENCE

IT/Arduino Team Intern — James Polymers Manufacturing Corporation

July 2025 – August 2025

On-the-Job Training

- Designed and built a prototype automated quality-control system using an Arduino Nano and Sentry2 vision camera to detect defective products.
- Calibrated and optimized vision parameters to distinguish defective products from acceptable products during inspection.

Store Crew — Goldilocks*March 2026 – August 2026*

- Delivered customer service and processed POS sales transactions, maintaining accurate handling of customer orders and payments.
- Handled cash and card payments accurately while supporting day-to-day store transactions.

EDUCATION

Bachelor of Science in Computer Engineering*2022 – 2026**Cavite State University – CCAT Campus, Tanza, Cavite*

- Undergraduate thesis: LibLocker — an automated library baggage counter using dual-frequency RFID (see Projects).

Senior High School, STEM Strand — Graduated with High Honors*2020 – 2022**Cavite Science Integrated School***CERTIFICATIONS**

- Civil Service Eligibility (Professional Level) — Civil Service Commission, 2025

SEMINARS & TRAININGS ATTENDED

- The Project Mindset: Going Beyond the Classroom — ACEU Week 2026, Lyceum of the Philippines University–Cavite, May 2026
- GEN AI TO Z: A Career Summit in an AI-Driven World — Vibe Coders PH x UP EMC² Fraternity, 2026
- Arduino Day Philippines 2026 — Arduino Days Philippines, March 2026
- ASEAN Data Science Explorers Enablement Session — DICT IV-A & WiTech Batangas, 2024

LANGUAGES

- Filipino — native
- English — fluent, professional working proficiency
