---

## PROFILE

Computer Engineering graduate of Cavite State University–CCAT Campus (2026) with hands-on experience building full-stack web applications and embedded/IoT systems. Led development of LibLocker, an undergraduate thesis project automating library baggage handling with a Raspberry Pi and dual-frequency RFID, from hardware integration through deployment and field validation. Comfortable across the stack: PHP/MySQL and JavaScript for the web, Python for backend and embedded logic, and Flutter for mobile. Seeking an entry-level Software Developer, Web Developer, or IT role where I can keep building and shipping full-stack and embedded systems.

---

## EDUCATION

### Bachelor of Science in Computer Engineering

2022 – 2026

Cavite State University – CCAT Campus, Tanza, Cavite

- Undergraduate thesis: LibLocker — an automated library baggage counter using dual-frequency RFID (see Projects).

### Senior High School, STEM Strand — Graduated with High Honors

2020 – 2022

Cavite Science Integrated School

---

## TECHNICAL SKILLS

**Languages:** PHP, JavaScript, Python, C++, HTML5, CSS3, SQL

**Frameworks & Libraries:** Flask, Node.js, Flutter (Dart), React, Bootstrap

**Databases:** MySQL, Firebase

**Embedded / Hardware:** Raspberry Pi, Arduino, RFID (RC522 HF, R16-7DB UHF), GPIO/SPI, I/O expanders (MCP23017)

**Tools & Practices:** Git, Linux (Raspberry Pi OS), SSH, REST-style web integration, Agile team collaboration

**Soft Skills:** Team collaboration, problem solving, time management, adaptability, fast learner

---

## PROFESSIONAL EXPERIENCE

### IT/Arduino Team Intern — James Polymers Manufacturing Corporation

July 2025 – August 2025

On-the-Job Training

- Designed and built a prototype quality-control system using an Arduino Nano and Sentry2 vision camera, enabling automated detection of defective products.
- Calibrated vision parameters, enabling accurate classification between defective and acceptable products.

### Store Crew — Goldilocks

March 2026 – August 2026

- Provided customer service and processed sales transactions through a POS system, ensuring accurate handling of cash and card payments.

---

## PROJECTS

### LibLocker — Automated Library Baggage Counter (Undergraduate Thesis)

2025 – 2026

Raspberry Pi 4B | Python/Flask | Dual-Frequency RFID — 3-member team

- Designed a dual-frequency RFID system architecture, combining HF RFID (13.56 MHz, RC522) for locker access with UHF RFID (915 MHz) for passive entry detection, resulting in a working Flask-based Python kiosk deployed at the Cavite State University–CCAT Campus E-Library.
- Integrated 24 solenoid locks and reed switches via MCP23017 I/O expanders on the Raspberry Pi 4B, and engineered a custom USB-to-RS232 adapter with a Python driver to resolve UHF reader integration, enabling reliable 3-strike violation tracking.
- Deployed and configured the production Pi environment (SSH, UFW firewall, SPI), then validated the system with 30 respondents, achieving 100% RFID pairing accuracy, 100% retrieval accuracy, a 6.8s average transaction time, 95% system uptime, and ISO/IEC 25010 & TAM usability mean scores of 4.63/5.

### RAWR Casino — Web Application

2025

PHP, MySQL, JavaScript, HTML/CSS

- Built a web-based casino application with user authentication and database-driven functionality using PHP and MySQL.

- Developed backend logic for game functionality and persistent data handling.

TourGO — Car Rental Web Platform

2025

PHP, MySQL, JavaScript, HTML/CSS

- Built a full-stack car rental web application with customer, agency, and administrator workflows using PHP, MySQL, and JavaScript.

**Escape — Multiplayer Mobile Game**

2024

Flutter | Frontend Developer

- Created an offline multiplayer board game, engineering custom mechanics (wormholes and portals) for unique gameplay.
- Implemented turn-based game logic and a responsive UI, resulting in smooth multiplayer gameplay.

## CERTIFICATIONS & TRAINING

---

- Civil Service Eligibility (Professional Level) — Civil Service Commission, 2025
- GEN AI TO Z: A Career Summit in an AI-Driven World — Vibe Coders PH × UP EMC<sup>2</sup> Fraternity, 2026
- ASEAN Data Science Explorers Enablement Session — DICT IV-A & WiTech Batangas, 2024

## LANGUAGES

---

- Filipino — native
- English — fluent, professional working proficiency
